# Airbus Group

Change Company ▾

Save Print Tutorial

## Summary

Airbus Group was created in 2000 from a series of European mergers. Daimler Aerospace (DASA) of Germany and Spain's CASA had agreed to merge in June 1999. Aérospatiale and Matra Hautes Technologies of France merged in 1999 to form Aérospatiale-Matra. DASA subsequently agreed to merge with Aérospatiale-Matra in October 1999. EADS came into being in July 2000. The company was reorganised and rebranded as Airbus Group in January 2014 (See section: Structure).

Airbus Group's capabilities are the design, manufacture and marketing of products and services in international markets for military and civil fixed-wing aircraft, helicopters, launch vehicles, satellites and missile systems. A major player in the civil and defence aerospace sectors, Airbus Group is perhaps best known as the owner of Airbus. Airbus Group is Europe's largest aerospace and defence company and the second largest aerospace and defence company in the world. In terms of market share, Airbus Group is among the top two manufacturers of commercial aircraft, civil helicopters, commercial space launch vehicles and missiles systems, and a leading supplier of military aircraft, satellites and defence electronics. The principal subsidiaries of Airbus Group are: Airbus (commercial aircraft); Airbus Defence and Space (defence electronics, military aircraft, and space systems); and Airbus Helicopters (commercial and military rotary-wing aircraft).

Following the restructuring of the company in 2013, completed in 2014, Airbus Group announced it would be targeting a number of subsidiaries for potential sale or spin-offs. The company named Atlas Elektronik, AvDef, ESG, Fairchild Controls, Professional Mobile Radio, and Rostock System-Technik as targets. See below for actual divestments.
